Web Developer

Self-taught with a background in psychology building complex online surveys for research trials. Looking for a new challenge to continue my growth.

Skills

Languages	Front-End	Back-End	Other	Soft skills
JavaScript	React	NodeJS	Qualtrics	Adaptable
CSS SASS Stylus	Styled-Components	Express	Git/Github	Resourceful
HTML Pug	Responsive Design	MongoDB	Jest	Resilient
SQL		PostgreSQL	GraphQL	Empathy

Experience

Qualtrics Programmer University of Exeter

June 2019 – Present

- Implemented websites from design to testing to deployment using Qualtrics and HTML/ CSS/ JavaScript including 4 complex 100-page surveys
- Established presentation consistency across browsers ensuring responsive design
- Autonomously added custom UI including buttons and video player to meet client's requirements
- Conducted unit and end-to-end testing of websites, app, and reporting tool
- Implemented Google analytics and Facebook pixel to track user progress across multiple websites
- Collaborated with external and internal IT teams to implement API integration
- Proactively maintaining awareness of technology to make recommendations to clients
- Liaised with clients to establish expectations, make revisions, and to support clients using software
- Managed interns including taking initiative to build a tutorial website with React to assist training
- Reported progress back to my seniors and implementing feedback to strict deadlines
- Received multiple offers to work on new trials
